

1. I will be making a professional portfolio because I believe that creating a website to show to an employer would actually be beneficial in the future. I also chose this because I have a short job history and creating a website might actually help me think of more things to put onto a resume. There are also not enough things that I have to show an employer so this would certainly assist with impressing one.

Professional/Portfolio

1. Hello, this website's main goal will be to inform you about myself, my qualifications, and my working history. Through this page I hope you will have a better understanding of my personal qualifications. This website will be worked on as a learning experience and I hope that this website will prove to be informative to any potential employers.
2. Hi, my name is Alec Schuetz, and I am 21 years old. I was born in St. Louis Missouri and grew up in Columbia Missouri. I work part-time at Body Refinery Gym as a Janitor to help save money for after college. I graduated from Hallsville high school in 2018 and haven't visited Hallsville since then. I graduated with my 2-year degree from MACC, and I'm working towards my 4-year degree at Mizzou.

- Since I was in highschool I've spent time working. When I turned 16 I sent my summers working at MBS. While I was there I worked in a warehouse picking books from shelves and packing them for shipping. I worked there for 4 summers and I became trusted enough to do multiple jobs around the warehouse as a temporary employee.
 - Since highschool I've had a consistent part time job working at Body Refinery Gym. I've been in charge of the gym's sanitary conditions for 5 years and currently I'm solely in charge of keeping it clean. I still currently work there part time since I am a full time college student. I learned a lot from this job and I believe working there has made me a more reliable worker.
 - I spent 2 years at Moberly Area Community college working towards my associates degree and currently have it. This experience was a shocking change from high school and I believe that this experience helped make me more independent as a person. This experience also greatly assisted me in business and economic knowledge since all of my classes primarily focused on these topics.
3. After all of my education and time spent working I believe it has made me a much more reliable and independent person. Since I started working at MBS and Body Refinery Gym as a teenager I learned more basic things like arriving on time, patience, paying attention to detail, and that taking your time often obtains better results than rushing. My college experience has taught me more about the business world and how the government and economy works. It also taught me a feeling of independence in my own work and a pride for the work that I went out of my way to create.
